

## Jarrow Man Killed By Lightning

Irma folk are sincerely shocked and grieved to learn that Gordon Whidden, well-known and highly regarded young man of the Jarrow district was instantly killed when struck by lightning.

Gordon was working with his tractor on a farm north of Jarrow at about 2 p.m. on Tuesday, June 12 when the accident occurred. A neighbor noticed the glow and tractor with the engine still running humped together in a slough. Gordon's body was found some little distance away. His hat was still smoldering from the lightning stroke.

Deepest sympathy is felt for the wife who was the former Helen Knudson, the children, Wayne and Gail, and also for Gordon's parents who are old timers of the Jarrow district.

## Mother and Son Severely Burned In Freak Explosion

Mrs. Jack Lehr, teacher in the Hutterite Colony, north of Jarrow, and her son Gordon were badly burned Thursday evening about five o'clock when a can containing paint brushes and gasoline exploded, which Mrs. Lehr thought contained distillate when she poured it into the kitchen stove. She received burns about her face and shoulders and Gordon received severe burns about his face. They were rushed to the Viking hospital by a car from Fuder's Garage in Irma where Mr. Lehr was at the time of the accident. Both patients are reported doing as well as can be expected.

## Easterly Echoes

Mr. and Mrs. Allen Taylor and Mr. and Mrs. Jack Taylor motored to the city to spend a few days there.

The picnic planned for Paschendale is to be on June 22. This is always an event of wide interest.

Mrs. Ralph King entertained the Institute ladies on the occasion of their quilting party.

Mr. and Mrs. Gordon Fenton are in Edmonton now where they and family will be making their future home as soon as school is closed.

Mrs. Fitzpatrick is at the home of her daughter, Mrs. G. Fenton.

Mrs. C. Brickman of Viking, in her capacity as Commissioner, Convener, made a visit to the Battle River W.I. when they met at the home of Mrs. Alf Bacon. Mrs. R. Dempsey was appointed delegate to the constituency conference at Kinsella in July.

Messrs. Phil and Bill Inklin took in the Baseball tournament at Camrose.

Miss Joy Enger, Mr. and Mrs. Martin Enger and Arnold, Garth Tomlinson spent Tuesday at the Baseball Tournament at Camrose.

Mrs. James Barrett and daughter are expected for a visit at the home of her parents, Mr. and Mrs. Joshua Holt.

Robert Davidson and sons Robert and Donald from Perow B.C. are spending a week at the home of Wilford Sanders.

## Weatherman Puts Damper On Legion Sports

The weatherman dealt out some most unreasonable weather for the Annual Legion Sports held here on June 6.

Early in the day it was cloudy with a high, bitterly cold wind and by the middle of the afternoon it was raining in a very forthright way. This rain continued steadily and pretty well spoiled the day for all.

The assembled ball teams tried their best to put on the games as scheduled and several 5 to 6 inning games were performed under trying conditions.

The results of some of these games are as follows:  
Hardball — Loughheed won from Irma; Hardisty from Weinwright. No finals played. Money split between Loughheed and Hardisty.

Men's Fastball — Strawberry Plains won from Albert; Aplomb from Paschendale. No finals. The money was divided between Irma, Aplomb and Strawberry Plains.

Ladies Fastball — Irma H.S. won from Irma Ladies. Mannville H.S. played two innings against Irma High and the game was called because of the rain. Money divided evenly between the three teams.

The Legion boys went to a lot of work in trying to make this Sports Day a success. We do hope next year will see a more favorable day for their efforts.

## Explorer Group Entertain

On Tuesday last the Explorer group, composed of Della Symington, Connie Owen, Lorraine Pined, Evelyn Miles and Kay Allen, with their leader Mrs. Burton, gave a party in the church parlor for the mothers and the members of the WMS.

The grown-ups were astonished at the work accomplished by these six girls, between the ages of 9 and 12 years. Each member seemed so capable in taking part in a business meeting, conducting devotional or at organizing games and contests.

Each member was presented with an embroidered linen towel and decorated vase filled with handmade tulips and Mrs. Burton was given a lovely glass juice set by her group members.

These girls, under Mrs. Burton's able leadership, had worked hard during the past year and had managed to make quite a sum of money. After paying all expenses, the group decided to give seven dollars to the WMS and 17 dollars to the United Church. Mr. and Mrs. Inglis were asked to receive these gifts and they warmly thanked and commended the group for its efforts.

A lovely lunch was then served by these six young girls.

Mrs. Coffin, WMS president, expressed thanks for all the ladies present and everyone went away happy, to think of the work being done by Mrs. Burton, and the Explorer group.

## Southern Sayings

Mr. and Mrs. Earl Tomlinson were Holden visitors this week.

Mr. Nels Funk and Mr. Johnny Friesen of Beaverflat, Sask., were visitors at P. Funk's this week, returning to Sask. with two Hereford Bulls.

Mr. and Mrs. Brick Reed of Edberg were visitors at Mr. and Mrs. Otto Seltzer a week ago.

A large crowd attended the Farmers' Picnic and dance last Friday.

With the weather staying nice, the farmers are again able to thresh and combine.

Mr. and Mrs. T. Bronson and family of Hardisty were visitors at Mr. and Mrs. Jackson's Sunday.

## Farmers Celebrate First Official Holiday

Farmers cele first off holiday

The members of Gratton Local FFA No. 770 and their friends celebrated June 8 at Strawberry Plains School. This enjoyable afternoon was well attended. There were several ball games and races for the kiddies with plenty of ice cream for everyone. A buffet lunch brought the evening to a pleasant conclusion and everyone left for home feeling it had been a good afternoon.

A house capacity dance was held at night. Everyone had a good time. Music was by Larry Funk, Freddie Bacon and Stan Orcheski. We are all looking forward to an even bigger and better time next year.

## Card of Thanks

I would like to extend thanks to Floyd Fuder of Irma, and the Minister of the Hutterite Colony for the kind assistance given when my wife and son were severely burned at the Colony on June 7. Jack Lehr.

## Good Prizes Awarded At Calf Club Show

The Irma Calf Club held its fourth annual show and sale of baby beef on June 5. Auctioneer Gordon Stalker sold 21 head for an average of 32 1/2 cents with a top of 37c for the grand champion.

J. Cairns from the Vernon School of Agriculture placed the calves.

1. Gordon Firkus, 2. Ken Orcheski, 3. Ronnie Firkus.

Grooming Competition

1. Erling Nilson; 2. Ronnie Firkus; 3. Bert Smith.

Showmanship Competition

1. Bert Smith; 2. Keith Currie; 3. Verla Prior.

Junior Judging Competition

1. Irene Archibald; 2. Keith Steele; 3. Colleen Archibald.

Mr. Cairns complimented the members on the very good scores in this competition and well written reasons for placings. Club members were given free tickets to a banquet sponsored by the Irma Board of Trade after which prizes were distributed. In addition to generous cash prizes the following special prizes were awarded:

F. T. Thurston—\$5.00 for first in showmanship.  
Steve Hlynka—A belt to owner of best groomed calf.

J. C. McFarland—\$10.00 for the girl with best calf.

Ivan Bolgar—\$10.00—\$2.00 each for owners of last 5 calves.

T. Eaton Co.—Grooming kit for best groomed calf.

United Grain Growers—100 lbs. concentrate to owner of lowest calf, providing he feeds one next year.

Irma Co-op—same as above.

Vern Sampson—same as above for second last calf.

The following generously contributed cash to the general fund:

W. N. Fricolton ..... \$3.00  
Imperial Lumber Co. .... 3.00  
Irma Food Market ..... 3.00  
Art Long and Son ..... 2.00  
Central Garage ..... 5.00  
Irma Machine Works ..... 2.00  
Irma Hotel Co. .... 10.00  
J. C. McFarland Co. .... 10.00  
Irma Sales and Service ..... 3.00  
R. Hansen ..... 2.00  
O. Nilson ..... 2.00  
Imperial Hardware ..... 3.00  
Bank of Montreal ..... 10.00  
Club Cafe ..... 2.00  
Irma Co-op ..... 5.00  
Carl Anquet ..... 5.00  
W. Masson ..... 5.00

The members of the senior committee wish to thank Mr. Stalker, all donors, local buyers and other members of the community who helped make this Achievement Day possible.

## Surprise Party Held Sunday

A surprise party was arranged on Sunday last by neighbors and friends of Mr. and Mrs. J. Lambert on the occasion of their 25th wedding anniversary.

Mr. and Mrs. Lambert came from England to the Avonlea district north east of Irma in 1929 and have resided there ever since, where they have made a wide circle of friends.

There were 58 persons present at this party. On behalf of the community a gift of glassware was made to the happy couple. Their family presented them with a chest of silverware in the Evening Star pattern. Irma friends wish Mr. and Mrs. Lambert many more years of happiness together.

## NOTICE

The Wainwright Clinic announces the absence of Dr. G. M. Aschah from the office in Irma, while on summer vacation. The office will re-open June 28, 1951. 25-15c

## Jarrow News

The community was shocked when they heard that Gordon Whidden had been instantly killed when struck by lightning on Tuesday while operating a tractor on H. Smith's farm north of Jarrow. The sympathy of everyone here was for the family.

The Ladies Aid meeting which was to have been held at Mrs. W. R. Meakins on Thursday, June 14, has been postponed until further notice.

Mrs. Jack Lehr and her youngest son Gordon met with a painful accident last Thursday evening when Mrs. Lehr used fuel oil to light her fire. They were both quite seriously burned about the face and arms. Both were rushed to the Viking hospital and from latest reports are coming along nicely.

Mr. and Mrs. Colin Carter accompanied by his mother Mrs. H. Carter and Vivienne, were recent visitors at the G. Bridgeman and Carter homes.

Kenneth Orcheski came home on Saturday after spending a few days in the Viking hospital. He says he's feeling fine again.

Miss Norma McCullough of Wainwright is acting as substitute teacher at the Colony during Mrs. Lehr's absence.

Metropolitan and Batts were quite well represented at the Calf Club show in Irma and walked off with the top honors. First and third prizes went to the two Firkus boys while Kenneth Orcheski took second and Bert Smith 4th. Good work, boys, and keep it up.

## Receives Thanks

Edmonton, Alberta, May 29, 1951.

Mrs. E. H. Targett, Secretary-Treasurer, Red Cross Branch, Irma, Alta.

Dear Mrs. Targett: Would you please thank all the volunteers who so kindly arranged for and assisted at the recent clinic at Irma.

Our team was very appreciative of the excellent facilities provided and on the splendid organization of the clinic. You will be interested to know that the 62 blood donations received at Irma plus those received at Wainwright were being put to use within a day of our return to this depot.

May I add my personal thanks for the excellent facilities provided.

Yours sincerely,  
D. I. Buchanan, M.B., D.P.H.,  
Provincial Medical Director.

## Good Speaker At H.S.A. Meeting

The Irma Home and School Association were very fortunate to be able to listen to an address by A. A. Aldridge of the Department of Child Development and Guidance of the Department of Education. It is regrettable that our last year's harvest has lasted so long, as it kept many country members at home. Mr. Aldridge's address was interesting, educational and very entertaining. He gave a clear picture of the hopes and aims of the present educational plan which should be of great value to the students privileged to come under its influence. Many of his statements were well worth quoting but I cannot give the exact wording and therefore cannot quote him. Many will well remember his advice and be glad to give a verbal report.

The election of officers was left over until the September meeting. —M. J. Chase.

H. W. Inglis, Minister.

## Junior W.I. Holds First Achievement Day

The Irma Prairie Chickens W.I.G.C. held their Achievement Day on the evening of Wednesday, May 23 in the lunch room of the school. Many mothers and friends attended, as well as Miss Reed, the District Home-Economist. They had on display the sewing articles which were made during the year.

Annquist judged during the afternoon. The following members won the ribbons in each group:

**Sewing Kits**

First—Irene Dootson.

Second—Carlynn Morse.

Third—Isabel Jackson.

**Hanger Covers**

First—Reta Fawcett.

Second—Irene Dootson and Isabel Jackson.

Third—Charlotte Milne.

**Clothes Bag**

First—Irene Dootson and Isabel Jackson.

No Second.

Third—Charlotte Milne and Lorna Archibald.

**Dickie**

First—Irene Dootson.

Second—Jean Larson and Char-

lotte Milne.

Third—Isabel Jackson.

**Aprons**

First—Irene Dootson and Carlynn Morse.

Second—Jean Larson.

Third—Donna Coultman and Charlotte Milne.

After the visitors had looked over the sewing, handicraft articles and the year's program book, Mrs. Fuder and Miss Reed spoke on Girl's Clubs. Following this the girls held a Fashion Parade, showing clothing, suitable and unsuitable for school and vacation wear.

During the evening Verle and Gail Sampson sang 'It's No Secret' and 'Galaway Bay' and Doreen Simmerman sang 'Keep on Hoping' and 'Mighty Like a Rose'. Shirley Mae Brown played the piano.

In appreciation of their work with the club, the girls presented Mrs. Fuder and Miss Reed with gifts of chinaware. The evening closed with God Save The King, after which the club members served a delicious lunch.

## Faith in Canada

A GREAT DEAL IS HEARD in Canada, from time to time, about lack of national consciousness and failure of the people here to have faith in the great potentialities of their country. Foreign capital has developed many of our natural resources and built up industries; while a great many Canadians, some of them highly trained professionally, have gone to the United States to seek wider opportunities in their work there. Canada is a big country with a relatively small population, and because of this there has not always been the wealth, nor the demand for services which are found in the more thickly populated countries.

### Money Came From Abroad

It would be well, however, for the people to be more fully aware of the opportunities which Canada offers to those with initiative and imagination. In the past, Canadians have been accused of being unwilling to invest their savings in industries and the development of natural resources here, leaving the way open for investors from other countries, who had faith in the future of Canada, to assume this risk. These investments have contributed a great deal to Canada's growth and development and have given employment to many thousands of Canadians. However, there are many who feel that more Canadian capital could, and should, be invested in projects of this kind.

### Much Still To Be Done

Opportunities in Canada today are by no means limited to the field of investments. The great oil developments in Alberta, irrigation and land reclamation projects on the prairies, and forest preservation and power developments in British Columbia and the eastern provinces all offer unlimited opportunity for work and progress in this country. There are vast mineral resources to be developed, while the growing need for more food throughout the world challenges agriculturalists to find ways of increasing production. There is no lack of opportunity now for farmers, miners, engineers, scientists and all workers who have faith in Canada's future.

## Alberta Farmers Trap Beavers

### More Than 18,000 Beaver Ear-Marked For Fur-Coat Market

EDMONTON.—More than 18,000 of Alberta's beaver are ear-marked for the fur-coat market this year in a government program to keep the dam-building animals in equilibrium between the harm and good they do. Beaver have been heavily protected for 10 years and now are flourishing in most parts of the province. So, under a conservation scheme, 914 permits have been issued to Alberta farmers, allowing them to trap varying numbers of beaver on their lands. The number has been set by individual inspection of each farmer's land. He can sell the furs he collects.

The permits are bound to widely-ranging points as far north as the Peace River and as far south as the Crow's Nest Pass.

## Canada's First Processing Plant At Edmonton

EDMONTON.—A \$250,000 gas processing plant, first of its kind in Canada, now is operating on Edmonton's eastern limits, general manager D. K. Yorath of Northwestern Utilities limited, announced.

The new plant will assist in meeting the increased demand for natural gas service in fast-growing Edmonton.

The plant provides a market for oil field gas from the Leduc area, 21 miles south of Edmonton. The Leduc gas, piped from Imperial Oil's conservation plant at Devon, Alta., will be mixed at the processing plant with the company's gas supply from the Viking-Kinsella field.

An average of 11,000,000 cubic feet of gas daily now is being channelled to the plant through one pipeline from Devon. Another three pipelines are bringing 15,000,000 cubic feet daily from the Viking-Kinsella field. The peak winter load will be more than 100,000,000 cubic feet daily from these two sources.

The Viking-Kinsella field had been Edmonton's sole source of gas since 1928.

Construction of the processing plant was necessary because of the wide difference in the composition of the Leduc and Viking-Kinsella natural gas supplies. It makes adjustments to thousands of heating appliances in Edmonton unnecessary.

The "pop" made when an electric bulb is broken is caused by air rushing into the vacuum.

## Folks sure favor a MAGIC cake!

Mix and sift 3 times, 2 1/2 c. once-sifted pastry flour (or 2 c. once-sifted hard-wheat flour), 2 1/2 tps. Magic Baking Powder, 1/2 tsp. salt, 1 1/2 tps. ground cinnamon, 1/2 tsp. each of ground cloves, ginger, allspice, nutmeg and mace; mix in 1/2 c. washed and dried seedless raisins and 1/2 c. chopped walnuts. Cream 1/2 c. butter or margarine and blend in 1 1/2 c. lightly-packet brown sugar; beat in 3 well-beaten egg yolks and 1/2 tsp. vanilla. Add dry ingredients to creamed mixture alternately with 1/2 c. milk and spread batter in 9" square pan, which has been greased and the bottom lined with greased paper. Beat stiff, not dry, 8 egg whites and a few grains salt; gradually beat in 1 c. lightly-sifted brown sugar and spread over cake; sprinkle with 1/2 c. chopped walnuts and bake in a rather slow oven, 325°, 1 1/2 to 1 3/4 hours; cover lightly with brown paper for last half hour.

## SELF-ICED SPICE CAKE

**JET PASSENGER PLANE MAKES AVIATION HISTORY**—The world's first all-jet passenger plane, the British-built four-engined Comet, similar to Canada's Jetliner, made a historic flight of 2,414 miles from London to Cairo in 5 hours and 22 minutes. Carrying 28 passengers, the Comet's speed was over 400 miles per hour on this maiden trip as a civilian plane.—Central Press Canadian.

## Oil Company Sets Drilling Plans At Lloydminster

EDMONTON.—A large-scale development programme in the Lloydminster oil field has been announced by Excelsior Refineries limited in co-operation with Winch Petroleum limited and associates.

The proposed drilling programme follows recent expansion of the Excelsior refinery to handle increased demands for products of Lloydminster's heavy black crude. The field straddles the northern border between Alberta and Saskatchewan.

Excelsior plans to drill 60 wells, 40 of them this year. The company already has 80 wells on production in the region. The refinery's capacity, originally about 1,200 barrels of oil daily, has been more than doubled.

## Funny and Otherwise

An asylum patient who had been certified cured was saying goodbye to the director of the institution. "And what are you going to do when you go out into the world?" asked the director.

"Well," said the patient, "I have passed my bar examinations, so I may practice law. I have also had quite a bit of experience in college dramatics, so I might try acting." He paused for a moment, deep in thought. "Then, on the other hand," he continued, "I may be a teakettle."

When little Peter said his prayers, he always said, "Please make Cyril give up throwing stones at me. By the way, I've mentioned this to you before."

Bob: "I hear your brother's workin' now, Sam?" Sam: "Yus."

"How long he bin workin'?" "Three months." "What's he doin'?" "Six."

Form Master: "So you admit that this boy was thrown into a trough of water. What part did you take in the disgraceful affair?" Smith Miner: "I took the right leg, sir."

"The broad-minded wife closes one eye when her husband flirts with another woman," states a playwright. Yes, and it's usually her husband's.

The farmer was angry. What're you comin' home with your milk pail empty fer? Didn't the old cow give anything?" "Yep," replied his son. "Nine quarts and a kick."

Mother: "But, Freddy, if your earache is better, why do you keep on crying?" Freddy: "I'm waiting for d-daddy to c-come home. He's never s-seen me with an earache."

Actor: "My good blade carves the casques of men, my tough lance thrusteth sure, my strength is as the strength of ten—" Sergeant in the audience. Draft that man."

Boss: "You demand high wages for a man with no experience." Applicant:—"Well, you see, the work is harder when you don't know much about it."

2937

PEGGY

"AND THEN SHE SAID PETE AND I TOLD JANET THAT AS FAR AS I WAS CONCERNED...DIA, DIA, ETC..."

## ODDITIES IN THE NEWS

Six-month-old William Ward, of Toronto, strangled on the nipple of his bottle, fire department officials said. The parents found the baby unconscious in his crib with the bottle in his mouth.

A half-dollar coin was successfully removed from the throat of a 10-year-old girl, Carolyn McEachern, of Portland, was none the worse for swallowing the coin, the hospital reported.

**NO SLOUCH AS HEAD OF FAMILY**—Mrs. Robert Weatherill is no slouch when it comes to subbing as head of the family while her husband is fighting in Korea. She operates a 150-acre farm, looks after her eight children, and in her spare time bakes 20 loaves of bread each week.

## 800,000 Homes Is Not Enough

OTTAWA.—Another 800,000 new homes likely will be added to Canada's communities by 1960, bringing total housing units to 4,000,000. But even this big increase possibly won't fill the bill.

Dr. O. J. Firestone, trade department economist who makes housing his profession, estimated in an interview that about 477,000 families are doubling up with others—some because they are unable to obtain homes of their own and others because they prefer to live that way.

By 1960, he believes, the families in this category may swell beyond the 500,000 mark.

The 39-year-old Montreal economist is economic adviser to the Central Mortgage & Housing Corporation.

A graduate of McGill University with post-graduate work at the London School of Economics, Dr. Firestone has delved deeply into the Canadian housing situation for the last five years.

## Killer Pens Message To Young Men

### Prison Releases Script After Execution

VANCOUVER.—Joe Oullette left a message for "the young men starting a life of crime." He penned it in the death cell at Okalla prison farm while he waited to pay with his life for the slaying of two Chinese market gardeners.

Joe, 23 years old, died on the gallows and his message was released by prison officials.

"I'm just the fellow who should tell the rest about the wrong way of life as I've had the experience."

"I started out young. The first thing I ever stole was a pair of ice skates; then it got worse, until now I have only a few days to live. You see, kids, if you play you must pay and not only on earth but the Lord shall punish also if you do not obey. His law as well as man-made laws. I've not only broken man's law but God's law as well."

"If you must have money, the best and easiest way to get it is by working for it... never fool around with guns and knives."

"I never pays to be a tough guy and say: 'I don't care...' Oullette said he had wanted easy money "and you see what I got... There is no one to blame but myself."

And, the last message ended: "Thanks fellows for listening to this and I hope it helps you, if not in believing, then in leading an honest life."

Be content—but never satisfied.

# "Blue Bonnet Flavor"

## Makes all the difference"

Next time you serve baked potatoes—or any hot vegetables—season them with a generous glob of Blue Bonnet Margarine. You'll say it, too—"Blue Bonnet flavor makes all the difference!" It's the wholesome, appetizing flavor of choice farm products. Fresh, delicate, country sweet! Every bit as delicious when melting-hot, as when enjoyed cold on bread or sandwiches. Get "ALL 3"—Flavor! Nutrition! Econom-e-e! Ask for Blue Bonnet Margarine.

## Only Blue Bonnet Margarine Comes Packaged TWO Convenient Ways

One—in the regular-style economy package with color water delivery package. Two—in the sensational new YELLOW QUIK bag that makes coloring for cakes, for easier than ever before. Just press the button... I know the bag... and Blue Bonnet is yellow, ready to use! Ask your grocer for Blue Bonnet in whichever package you prefer.

## The Good Earth

N.A. Chomik, District Agriculturist

(From The Viking News)  
Interesting Results Announced  
At Feeders Day

Feeder's Day is known to many farmers in Alberta as the U. of A. Stock Pavilion to hear the results of feed experiments on various classes of livestock. I attended Feeder's Day this year and as in the past heard the review of the livestock feeding experiments. Some interesting results were announced by the professors in charge of these experiments and although the numerous results were quoted, one of a few of them can be dealt with here. The first is that of beef cattle feeding experiments. The most significant result, that was brought out, for the benefit of the farmers, was that grain feeding of cattle during winter is a profitable enterprise. The returns from grain marketed through steers, as indicated by 30 year records, were approximately double than the price paid at the elevator. The average price paid for a bushel of barley in this 30 year period when sold at the elevator was 54¢; on the other hand barley feed to steers brought \$1 per bushel. All costs except labour was accounted for when the last figure was calculated. In 1950-51 feeding experiments indicate a very substantial profit in feeding steers coarse grain and frozen wheat. Just as a point of interest, frozen wheat brought a price of 4.70 per bushel this year when fed to steers. No major digestive troubles were encountered when frozen wheat was fed and steers gained well on this feed.

Swine feeding experiments bear out the same results, namely that feeding swine is a profitable enterprise since that the price realized on grain marketed through swine is also approximately double that at the elevator.

An experiment on milking cows before calving indicated that this practice had no harmful effect on cows, on milk production or butterfat. It did not increase mastitis and slightly reduced the time required for udders to return to normal. Results indicated that pre-milking may be advisable in severe cases of udder inflammation. Calves from cows that were pre-milked should be fed Vit. A. The results showing profitable margins in the feeding of beef cattle and swine should be an encouragement to farmers throughout the province and this district to concentrate more on livestock feeding. There is a profit in feeding cattle during next winter and should be increasing swine production. Grain farming in itself does not give the same security as a proper balance between grain and livestock will give better returns, more financial security and improve the fertility of our land. Some farmers think that they are losing money by sowing cultivated land down to grasses and legumes. Actually, experiments prove that in this area the profits per acre from seeding land to forage crops and rotating with grain, with livestock as a means to market both of these crops, are much higher than can be realized from straight grain farming.

We have copies of the bulletin on Feeders Day and results of the experiments 1950-51 and these are available upon request. I would be willing to discuss in detail these experiments with any one seeking to procure more information.

### Onion Maggot

Damage from onion maggot was noticed throughout this district last year. The following information, I hope, will be of aid to the gardeners to control maggots. The onion maggot is the larvae of a two-winged olive-green fly smaller than a house fly. The fly starts to lay eggs when the onions are 1 to 2 inches high. The eggs are laid in the soil around the neck of the onion or sometimes inside the outer sheath. As soon as the eggs hatch the young maggots bore into the base of the onion stem and feed on the bulb. Feeding of maggots on onion usually results in death of the plant, older plants being able to survive better. Onion maggot is not easy to control and timing of the treatment is important.

Watering the soil 2 inches on each of the rows of seedling onions 1 to 2 inches high with a solution of corrosive sublimate, at 1 ounce to ten gallons of water, is recommended. This chemical should be mixed in a glass, crockery or wooden container, as its value is lost if it comes in contact with metals. Corrosive sublimate is extremely poisonous and should be handled with care.

## Times Sure Do Change

The following reproduction of a notice posted in an Amboy, Illinois store operated by the founders of what is now the Carson Pirie Scott and Co. stores of Chicago has often been repeated. However, in the 1880s and thereabouts, a set of operating rules and regulations such as these for employees of many a business enterprise were not considered exceptional and as such it is worthy of repetition.

1. Stores must be open from 6 a.m. to 9 p.m. the year 'round.
2. Store must be swept; counters, shelves and showcases dusted; lamps trimmed and filled and chimneys cleaned; pens made; doors and windows opened; a pail of water and a bucket of coal brought in before breakfast. (If there is time to do so, attend to customers who call).
3. The store must not be opened on the Sabbath unless necessary and then only for a few minutes.
4. The employee who is in the habit of smoking Spanish cigars, being shaved at the barber's, going to dances and other places of amusement will assuredly give his employer reason to be suspicious of his integrity and honesty.
5. Each employee must pay not less than \$5.00 per year to the Church, and must attend Sunday school regularly.
6. Men employees are given one evening a week for courting, two if they go to prayer meeting.
7. After 14 hours in the store, the leisure hours should be spent, for the most part in reading.

## Gas Firm Seeks 22% Boost In Revenue

A 22-per cent increase in overall revenue is required for the operations of Northwestern Utilities Limited during 1951, it was claimed by R. Winslow Hamilton, accountant consultant, at the gas rates hearing in the courthouse, Edmonton, Friday.

Northwestern seeks increased gas rates to meet "higher capital expenditures" and to assure a return of eight per cent on the company's investment. The application is being heard by G. M. Blackstock, chairman of the public utilities board, whose decision will affect Edmonton and district towns which are served by Northwestern's natural gas.

## This Weed Killer Is Cattle Menace

A weed killer, sodium chlorate, carelessly left so that cattle found their way to it, has killed \$3,000 worth of cattle recently, according to Dr. E. E. Ballantyne, Director of Veterinary Services of the Department of Agriculture.

In the Lindberg area, six head of cattle died suddenly after eating sodium chlorate from an open drum. Autopsy by the Veterinary Services Branch revealed heavy concentrations of sodium chlorate in the animals' organs.

The other case of poisoning involved several head of cattle in the Wainwright district. These cattle also had eaten sodium chlorate. Two of the cattle died almost immediately, and four others a week later. Several other cattle were seriously ill from the poison.

Dr. Ballantyne advised great caution in the use of poisons. They should be left where children and animals cannot reach them. If livestock is poisoned, oily laxatives such as raw linseed oil and mineral oil provide emergency treatment but a veterinarian should be called immediately.

## Gas Co. Tells Plans For 1952

Capital works program of NWU Ltd. for 1952 is estimated to cost \$5,210,000, according to a submission to the public utilities commission in support of the company's application for increased rates to consumers. The 1951 program is estimated at \$4,646,100.

Proposals for next year include \$1,054,000 for wells and field lines in the Kinsella area, and \$1,630,000 for a field compressor station. There is \$793,000 for the Viking-Edmonton transmission system, where a fourth main line is under construction. There is \$155,000 for extensions to large industries.

Total estimated for the distribution system next year is \$899,000, including \$300,000 for extensions and \$187,000 for service installations.

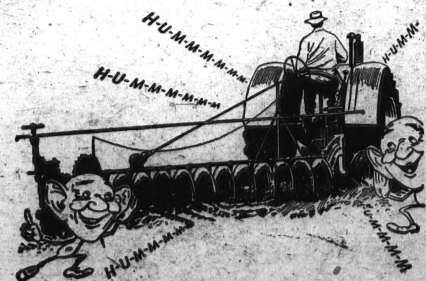

## He's a going concern!

BILL IS ANOTHER enterprising boy who is learning to appreciate the value of saving for what he wants. Each week, he puts a part of his spare time earnings in the bank. And is he proud of his bank book!

Many a businessman credits his success to the habit of thrift learned early in life. Planned saving has helped millions of Canadians to make the most of their own enterprise and industry.

Experience has shown that the difference between "getting along" and "getting ahead" often starts with a bank account. Use the chartered bank in your neighborhood as a safe and handy place to make your savings grow.

## Makes all your Farm Machinery H-U-M-M

Marvelous Gear Oil reduces friction to a minimum. Enables your tractor to deliver maximum power at the drawbar—that's where it counts! It is a high grade, full bodied lubricant that stands up and gives maximum protection to gear tooth surfaces—be it your precision built tractor, truck or combine. Marvelous Gear Oil is proven two ways—in the laboratory and in grueling field work.

'Marvelous Grease' is a high quality, water resistant grease that positively clings to whirling bearings. It gives full protection to moving parts and holds its consistency over prolonged periods of use. There is a grade for every need and season. No. 0 for cool weather, No. 1, full bodied, for heavy duty lubrication and No. 2 for hot weather use when going is toughest.

There is extra protection in every Marvelous Grease and Gear Oil. Use the one that's best suited for your job.

## Farmers Borrow \$63 Million Under Improvement Loans Act

Canadian farmers borrowed \$63,421,363 through 58,969 individual loans under the Farm Improvement Loans Act during 1950. The Act, which has been in operation six years, was recently extended by Parliament for another three years from March 1, 1951.

Over the six year period of operations \$170,054,703 has been borrowed and the sum of \$96,983,498 had been repaid at December 31, 1950, which is equivalent to 56.8 per cent. of the total amount lent. During this period only 35 claims amounting to \$15,690 were made under the Government guarantee.

**Farm Implements and Trucks**—As in the previous five years, loans for the purchase of farm implements and farm trucks represented the greatest volume of lending under the Act during 1950 and amounted to \$58,391,635. About 45 per cent. of all tractors, 64 per cent. of all combines and 50 per cent. of all threshers purchased in Canada last year were financed under the Act.

**Farm Building**—Farm building loans amounted to \$24 million for the year. Construction of 131 new farm homes was done with assistance of loans amounting to \$797,648. An amount of \$754,835 was borrowed for the erection of 650 new farm buildings such as barns and sheds. In addition 967 loans amounting to \$49,826 were made during the year for the alteration and repair of farm homes and buildings. This included the installation of plumbing systems and central heating equipment.

**Purchase of Livestock**—Loans numbering 1,805 and totalling \$1,483,474 were made for the purchase of livestock. Most of these were made to operators of small farms purchasing milch cows and registered breeding stock.

**Clearing and Breaking Land**—Since the inception of the Act in 1945, 6,864 loans have been made to the amount of \$2,533,180 for clearing and breaking new land for cultivation. The majority of these loans were concentrated in the northern sections of Alberta and Saskatchewan where settlers are developing new agricultural areas.

The lending by provinces in 1950 was: British Columbia, 1,693 loans, \$1,709,994; Alberta, 17,161 loans, \$18,608,716; Saskatchewan, 20,090 loans, \$22,557,445; Manitoba, 7,712 loans, \$8,263,981; Ontario, 7,814 loans, \$8,043,839; Quebec, 8,003 loans, \$3,097,204; New Brunswick, 348 loans, \$368,705; Nova Scotia, 340 loans, \$274,940; Prince Edward Island, 709 loans, \$605,518; Newfoundland, 2 loans, \$666.

Loans under FILA are made for a variety of purposes around the farm and may be obtained for varying periods depending upon the amount borrowed and the purpose for which the loan is made.

which the loan was obtained. The maximum of an individual loan is \$3,000 and it is repaid at five per cent. simple interest.

All FILA loans are made through the chartered banks of Canada. Any farmer interested in borrowing under the Act should talk the matter over with his local bank manager.

## Bombing And Gunnery Range To Be Established

OTTAWA.—Agreement has been reached with the provinces of Alberta and Saskatchewan for establishing a large R.C.A.F. bombing and gunnery range roughly 100 miles northeast of Edmonton, announced recently by Defence Minister Brooke Claxton.

The range will cover an area of several thousand square miles. Air Force officials said it is necessitated by the high speed of modern jet aircraft and the long range of their weapons, including rockets and cannons, which result in a large increase in the danger area. There will continue to be a requirement for the existing bombing and gunnery ranges in current use.

The new range will also be used in connection with the development and evaluation of various forms of air weapons including particularly air-to-air rockets.

The range will lie to the east of the Northern Alberta Railway and will be roughly centred on Primrose Lake, stretching about 115 miles from east to west and 40 miles from north to south, with the possibility of almost indefinite extension to the north if later required.

There are no settlements in the area and compensation will be paid for any property rights in trap lines, etc., affected.

Construction will be started immediately on necessary runway, operations buildings, and barrack blocks, etc., at an estimated cost of \$14,000,000.

**Mineral Claims Set Saskatchewan Record**  
REGINA.—Total of 1,293 mineral claims, an all-time high, was asked and recorded in Saskatchewan in the year ended March 31, 1951. Resources Minister J. H. Brockelbank said in a bureau of publications release.

This total surpassed by 97 the previous record set in 1949-50 when 1,196 claims were staked. The 1949-50 and 1950-51 records were mainly due to uranium prospecting in the province, according to Mr. Brockelbank.

### GEMS OF THOUGHT

#### SIMPLICITY

In character, in manner, in style, in all things, the supreme excellence is simplicity.—Longfellow.

The art of art, the glory of expression and the sunshine of the light of letters, is simplicity.—Walt Whitman.

When the heart speaks, however simple the words, its language is always acceptable to those who have hearts.—Mary Baker Eddy.

What is true, simple and sincere is most congenial to man's nature.—Cicero.

The greatest truths are the simplest; and so are the greatest men.—J. C. and A. W. Hare.

Elegance of language may not be in the power of all of us; but simplicity and straightforwardness are.—Alford.

### Helpful Hints

When you serve canned asparagus use the liquid in white sauce, in soup, or in gravy. Don't throw it away—it's full of nutrients!

It's easier to wash socks than to clean the upholstery of your car, so try this trick next time you take the children travelling. Pull on a pair of clean socks over their shoes. Their feet will stay warm and the seat covers will remain unsoiled.

When you are putting stamps on a large number of envelopes at home, try using an ice cube instead of a sponge for moisture.

Do not use carpet runners over your rugs or carpets to save wear. They are apt to do more harm than good. The sizing on the back of the runner will act like sandpaper on the carpeting. Soft woven rugs placed at the doors to prevent dirt being tracked across the carpet is a better way to prevent wear and tear on carpeting.

BRITISH ROYALTY VISITS VATICAN—Wearing a black gown and mantle, Princess Elizabeth is shown on her way to an audience with Pope Pius in Vatican City. Behind her is Prince Philip, Duke of Edinburgh. Walking beside the princess is Monsignor Nardone of the papal ceremonial knights of the cape and sword. The visit caused some criticism back in England.—Central Press Canadian.

## Young B.C. Woman Grows Earthworms

Big Business Can Be Developed In Using Worms For Soil Fertility

VICTORIA.—Mrs. K. L. Johnson has "wormed" her way into a business—the worm-raising business.

Worms mean big money in California and after a visit to that state to learn the importance of worms to soil fertility the young woman decided to try her hand at it.

She imported 1,500 worms from California and placed them in shallow earth-filled boxes at Bayview farm on Rocky Point, Vancouver Island. Every three weeks she collects the egg capsules and puts them in more boxes.

That's about all there is to it, she explained. But California worms, long and thin, are considered a better type than the local variety. She raises some of the latter, too, for the fishermen's trade.

Miss Johnson has been in business since last February, when she bought the farm.

With this as a starter she hopes to be able to develop the more usual aspects of farming. She aims to raise a crop of wheat this summer in order to make her own bread.

Apart from the sale of local type worms for bait, Miss Johnson has bigger hopes for her development of the California-type worms. The long, thin type is said to be the best for use in aerating and generally improving soil on farms and in vegetable and flower gardens.

### DISEASE POTENTIALS

Common cups, towels, lipsticks are potential disease spreaders—just as dangerous as a common toothbrush.

## : Selected Recipes :

A WELL PREPARED Swiss Steak is one of the most popular meat dishes especially among the men, and blends well with tomatoes, onions or mushrooms for variety.

### SWISS STEAK

Whether you cook your Swiss Steak on top of the stove or in the oven, here's how to be sure of a delicious result. Pound four thin, round steaks with edge of a leaf cover and cook slowly for 2 hours in a tenderizer, then for 3 hours.

brown the meat very slowly in hot fat, until it is well browned. Sprinkle with salt, pepper, and a dash of garlic salt. Pour 1 1/2 cups of tomato sauce over and around the meat, also two onions and a stalk of celery over; then add 1 bay leaf and cook slowly for 2 hours.

### VIRGIL

## Saskatchewan Has Woman For School Superintendent

Miss Marion Scribner Believes She Is The Only One In Canada

REGINA.—Miss Marion Scribner is Saskatchewan's only woman school superintendent, and thinks possibly she is the only one in Canada. There are women in Ontario with a similar title but Miss Scribner believes they work mainly as assistant to a male superintendent.

Miss Scribner's bailiwick is the Gull Lake district in the southwestern part of the province. She likes it there, and says she can see no advantage in transferring from one place to another. She would be happy to spend the rest of her life there—although she wasn't sure that would be a good idea either for herself or the district.

The Gull Lake superintendent has been on the job since 1946. Her training includes a bachelor's degree and certificate course in education at the University of Saskatchewan and a term as school principal at Wapella, Sask.

Miss Scribner says that as a woman she no doubt approaches her work in a manner different from male superintendents and that the people she encounters have a different attitude to her than they would have toward a man. But success or failure, she said, depends on the individual man or woman.

She has no feeling she is doing a

man's job. It is her job, and she expects and receives excellent co-operation from other educational workers in the district.

Miss Scribner explained the work of a superintendent is to give leadership in education within the area. In addition to her routine visits to the school rooms, during which she sees exactly what is being done in the classes and gives practical advice and assistance to the teacher, she does a good deal of executive work.

This includes visiting the various school boards to discuss problems of education. During the winter she prepares reports on the individual teachers for the provincial department of education. She compiles statistics and gathers information on the 83 school districts which make up her area.

Miss Scribner is strongly in favor of the larger school unit as a means of improving educational standards and increasing the efficiency of educational workers.

Often she accompanies groups of parents and trustees on visits to Shaunavon or Maple Creek, or other neighboring towns which are in a larger school unit. The result, she says, is always the same. The visitors realize that children attending larger area schools are enjoying benefits which are not available to children in the Gull Lake area, or in other areas outside the unit.

## CENSUS TAKERS TO VISIT 730,000 FARMS IN CANADA

Beginning on June 1 this year a census enumerator will visit each of the 730,000 farms in Canada to obtain answers to a series of questions about the farm. The last census of agriculture for all Canada was taken in 1941 and for the Prairie Provinces in 1946. Many farmers will therefore have had previous experience in answering questions on the agricultural schedule, but for some it will be the first experience.

The schedule for 1951 has been shortened considerably. Most of the questions are straightforward, such as acres devoted to crops, numbers of livestock on farms, and inventories of equipment. Some questions will require estimates by the farmer, such as value of his farm, and value of the home garden. Those questions are sometimes hard to answer but the information is of great value and is needed for adequate appraisal of the agricultural industry.

Farmers will be asked the numbers of animals sold off farms, production of crops in 1950, and certain major expenses. No answers will be made to obtain a balance between expenses and receipts; in fact, many of the questions of this nature have been dropped from the 1951 schedule.

It must be emphasized that the census enumerator is duty bound to obtain a report about every farm in Canada, and each farmer is asked to co-operate by being prepared to give him as accurate a statement as possible. Enumerators are pledged to keep all information given them confidential, as are also all employees of the Bureau of Statistics. The law provides penalties for any violation of this pledge. Further, the Bureau of Statistics may not divulge the business of an individual to any person except those who handle the census schedules in the course of their official duties, and that it will only be used in statistical compilations where its identity entirely disappears.

## SMILE OF THE WEEK

### THEY KNOW NOW

An elderly woman was taught bridge. One evening, while arranging her cards, she dropped one and, picking it up, observed: "No one saw that king, did they?"

"Hush, Granny," said her partner, "you shouldn't mention which card it was."

"It's all right, my dear; I didn't say it was the king of diamonds."

## PASSIVE ACCOMPLICES

RED DEER, Alta.—Magistrate James Smith in court here criticized older people who stand by and do nothing to prevent "foolish youths" breaking the law. Two youths were fined for stealing wheels, and three from a stranded car but the magistrate said older bystanders who made no protest were "passive accomplices."

## OUR COMPLETE SHORT STORY

## THE DOUBLE PLAY

Hi-jacking — There's Nothing Better Getting Something For Nothing And Selling At Regular Prices.

By JOHN T. KIERAN

I WAS a reporter at the time. And when I read about "The Man" passing in an eastern city lately it brought all those days back to me. At that time he wasn't the overlord of the underworld he later became, being then a small operator. Nor, his real name was, but when he got to the top he became known simply as "The Man", and everyone knew who was meant. He was it. Ruthless, brainy, he controlled racketeers like a yardmaster controls traffic.

I was standing near him, the two of us alone in a tiny speakeasy one night, when Heely, a henchman, rushed in, his black eyes marring. "Chief, they got another load. They took every drop."

Nordy's face flamed. "The second this week! What's wrong with this mob? Didn't they even fight back?"

"It would have been lead for 'em if they did. They were outnumbered. The hi-jackers had the drop on 'em before they knew what it was all about. Can't blame the boys too much. You know what resistance would of meant."

"Blame 'em," Nordy growled. "Blame 'em for being the punka they are?"

He turned to me, not caring who overheard his words or that I was a newspaper man. "If I could get twelve fast, smart guys I could make us all rich in six months. But here I've lost more this week than I'll make in two. But punks or not, Heely, turning to the other, 'Some-one is selling us out. Those fackars pull their stuff too neatly not to have been tipped; they know just when and where to do it. Who was drivin' that truck?"

"Andrea. They came out of a side road at him onto that narrow slab pavement near Farmingham, and forced him into the ditch. He just got back with the empty truck."

"Andrea, that dumb egg! But you know, lately I've been thinkin' he ain't half as dumb as he lets on. I think he's the guy that's sellin' out on us. How did those gollies know just when and where he was comin' along at the one place where they could easily ditch him?"

"I don't know. And this is the first truck we've sent over this new route, too. Thompson was along, but of course he's all right. And I had the truck all decked up on top with furniture so's no one would suspect what it carried. Someone'd have to know just what truck to be lookin' for."

"Well, we'll find out about Mr. Andrea," Nordy said grimly. "I never did think that was his real name, anyway. And this ain't the first load he's lost himself. If he's playin' us double he's gonna go on a one-way ticket. You try to sound him out. Try to get him to double-cross the gang. If he proves to be what we think he is—well, I always said there's only one way to treat a guy like that."

"I'll get the straight on him, all right," Heely declared.

Nordy thought for a moment. I've got a truckload going over to Easton tonight. You couldn't have a better opportunity to try out our little scheme. You and him take it out—even if you do come back alone."

I sidled out of the place at that. But of course it was on my beat and I was in the next day. And from what I picked up here is what happened after Nordy and Heely had been taking. Why didn't I go to the police, you ask? Why should I? And besides, what did I have, really? But anyhow here's the way I got it.

That night Heely and Andrea left with a load in a truck that apparently carried two farmers anxious to get their load of created chicken to market early. As they went along Heely talked freely to the fact that Andrea, tryin' to show him out. Was the fellow suspicious?

After they were more than half way to Easton he exclaimed: "Say, I don't blame them hi-jackers. Man, there'd be a lot of money in it, gettin' the police for nothing and sellin' it for five prices."

"Uh huh," Heely said.

"Listen," confidentially, "Somebody would make money by hi-jacking this car right now. 'Cause we make in months workin' for Nordy."

"Nordy's a hard guy."

"Oh—he's dumb. Say, you an' me could make a good haul by ditchin' this stuff and tellin' Nordy we were hi-jacked. We would shoot a few holes in the truck and he'd never know it wasn't a real job."

"Sure! We could sell it later. I've got friends who'd give us good prices for it in a minute. Heely looked at the other in the dim light as they drove along.

"Nordy wouldn't believe it," Andrea said finally.

Heely laughed. "How's he gonna help himself? Isn't it happenin' every night?"

"Let's get this straight. You want to hide the stuff and say we were hi-jacked. Then we'll come back for the stuff later and sell it?"

"That's the story."

"How do you know those people will buy it from us without tellin' Nordy what we done?"

Heely chuckled. "Haven't I sold 'em enough stuff before this to know they won't let out a word about it?"

Two hours later there was a knock on the door of Nordy's office.

"Come in!" he growled.

As his subordinate came in he looked up. There was a quarter-minute of silence.

"Well?" he finally asked. His voice had gone flat.

"You remember the load we was to take to Easton?"

"Yes."

"Well, Heely tried to get me to double-cross you and the gang—steal the stuff and say we were hi-jacked. There was a long moment of silence. Then: "Yes—"

Andrea shrugged. "He should of known what that would lead to. I done just what you've always said anyone should do. There's only one thing you can do with a fellow like that."

(Copyright Western Newspaper Syndicate)

## Plant Barley For Wild Birds

REGINA, Sask. — Saskatchewan game branch officials were preparing a giant meal for ducks, cranes and other birds in the Last Mountain Lake sanctuary. They were planting 100 acres of barley and wheat exclusively for the birds. The game branch only hoped the birds would eat their own grain this year instead of raiding farmers' fields as in the past.

**SHEEP KILLERS FALL TO HUNTERS' GUNS**—The careers of two wolves which killed many sheep in Prince Edward county, Ont., ended when Conservation Officer Forrest Richardson, (left), arrived with two trained wolf hounds. Previous efforts of local hunters had failed to find the killers. Those who were in on the kill pose with their trophies: Knocking—Forrest Richardson, Cooper Dullmage, Frank Demare, Jack Turtle and Harry Cowan. Standing—Elmer McConnell, Morris Tuttle and Herb Cowan. The business believe that a litter of young wolves is still at large and will become sheep killers next year.—Central Press Canadian.

## : Western Briefs :

## Brandon's Population

BRANDON, Man.—Brandon's population now stands at 21,214, an increase of 1,189 in the past two years. George Ogleby, city assessor, reported to the city council. This figure was produced during a recent enumeration held to prepare the city's 1951 electoral list.

## Gives Up Duties

CARDSTON, Alta.—Archdeacon S. H. Middleton, who retired two years ago, has now given up all diocesan duties. For 40 years he was principal of St. Paul's school on the Blood Indian reserve.

## Aid Rink Plan

DELEAU, Man.—Members of the Deleau curling club, who undertook farming as the club's money-making project for 1951, completed the seeding of a 70-acre field of flax on the farm of Andrew Ireland. Tractors, harrows and drills were operated by the 14 volunteer workers under the leadership of A. Deleau.

## Kiln Of Cure

EDMONTON, Alta.—A 50-year-old bottle of liniment turned up here with a label guaranteeing it to cure all kinds of human ailments. In addition, it was recommended for horses, cows, bulls and about every other occupant of the barnyard.

## Three-Legged Calf

MACKEY, Alta.—A three-legged calf born on a farm is reported as frisky as any normal calf. The calf was born on a farm 90 miles west of Edmonton, owned by Lin Bell and Charles Hagart. They said the freak calf has only one front leg just off centre of the animal's body. Otherwise, it is normal.

## Edmonton, Alberta

## Canada's First Horse Meat Store Does Rushing Trade

EDMONTON.—Horse meat is proving popular in Edmonton. That's the word from C. B. Moore and E. S. Ferguson, co-owners of Canada's first horse meat store. The shop—named The Pony Market—now has been in operation for several weeks and the owners say business is booming.

They also claim there hasn't been one serious complaint to date about their product.

"At first," Mr. Moore said, "our customers were mainly persons who had previously eaten horse meat overseas and welcomed an opportunity to purchase it again."

"But now we get almost as many Edmonton-born customers as those of European descent."

"Why, last Saturday alone about 600 people bought meat in our store and many of them have lived here all their lives."

The greatest attraction to budget-conscious housewives is, of course, the meat's relatively low price range as compared to other meats.

Most of the meat is sold for about 40 per cent. of regular beef prices. Top price for a horse tenderloin, for example, is 40 cents against \$1.50 per pound for beef cuts of that class.

Loins steaks sell for 35 cents compared with 95 cents for good quality beef steaks in nearby shops. Rump roasts or pickled hindquarters cost about 36 cents a pound and ground horse meat 25 cents.

The owners did not run into as much opposition as they counted on when they first approached the provincial government with the idea of selling horse meat for human consumption.

However, the shop's opening was delayed until the Edmonton City Council approved the issue of a retail licence and the Provincial Livestock Branch approved regulations covering sale of the meat.

Numerous citizens protested to the council claiming they refused to eat horse meat and might get stuck with some if sale became legal.

These protests were brushed aside by the council, however, after the city health officer said objections to sale of the meat were "purely psychological."

Council ruled, however, that no other meats were to be sold in the store and it was to be clearly advertised that the store sold only horse meat.

The horses for the meat are supplied by a processing firm with plants in Swift Current, Sask., and Edmonton.

This processing firm has been in operation for some years now and sold millions of pounds of horse meat to UNRRA for export to Europe after World War II.

About 11,000,000 pounds of pickled horse meat went to Belgium and almost 60,000,000 pounds of canned meat was sent to the Belgian Congo. An additional 9,000,000 pounds of frozen hindquarters were exported to France, Belgium and Holland.

## B.C. Lumber Industry Gets \$50 Million Order

VANCOUVER.—The British Columbia lumber industry got a \$50,000,000 order from the British timber control board.

Word was received a new contract for the sale of 600,000,000 board feet had been negotiated by a group of B.C. lumbermen now in the United Kingdom.

Shipments will total about 50,000 feet a month, starting in July. Present contracts with Britain expire in June.

The price is slightly higher than last year, lumbermen here said, but is still under the ruling world export market price.

## NEED MAPS

SASKATOON.—The Saskatchewan Motor Club has announced that, as a result of its decision to decline a provincial government grant, it will no longer supply road information to motorists who are not members of the club.

## SWEDEN'S POPULATION

STOCKHOLM, Sweden.—Sweden's population passed the 7,000,000 in 1950, official returns showed. A total of 7,046,930 Swedes were counted.

## Tender OATMEAL ROLLS

They "pan out" perfectly with new Fast DRY Yeast!

● No more yeast worries! No more yeast that stales and weakens! New Fleischmann's Fast Rising Dry Yeast keeps FULL STRENGTH all the time! FAST ACTING when you use it! Needs no refrigeration—get a month's supply and keep in your cupboard!

## OATMEAL ROLLS

● Stirring constantly, quickly pour 1 c. boiling water into ½ c. oatmeal. Scald ½ c. milk, 2 tb. granulated sugar, 1½ tsp. salt, 1 tb. molasses and 5 tb. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes. THEN stir well. Mix in oatmeal; then lukewarm milk mixture. Stir in 2 c. once-sifted bread flour; beat smooth. Work in 2½ c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough and turn out on board sprinkled with oatmeal; cut into 2 equal portions and cut each portion into 16 pieces. Knead into smooth balls and arrange in 2 greased 8" square cake pans. Grease tops. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, about 30 minutes. Yield—32 small rolls.
